

# Real-time information SAVES LIVES

## EasyFinder

### Real-Time Mobile Tracking System

EasyFinder is a portable dispatcher system with an integrated tracking solution. It facilitates planning and execution of a search and rescue operation by monitoring the area of interest with regards to search coverage and personnel positions. The system offers instant communication with the personnel on the field and other services (police, firefighters, helicopters, etc.). The real-time analysis of search coverage provides effective means for the operator to coordinate the teams and promptly adapt to the ever-changing situation on the field.

## Real-Time Mobile Tracking System

### Technical Specifications:

- › Power Supply:
  - 230 V mains supply
  - 12 V - 24 V external power supply (car battery)
  - Internal Battery with battery status indicator
- › Integrated Motorola Mototrbo(TM) Digital Mobile Radio VHF or UHF (Power 1 - 25 W)
- › Touch screen (15.6")
- › Gooseneck microphone
- › Connectivity:
  - Ethernet port
  - USB port
  - Wi-Fi
  - GSM 4G modem
- › Dimensions: 49 x 39 x 19 cm  
19.3 x 15.4 x 7.5 in
- › Weight: 12 kg | 27 pounds

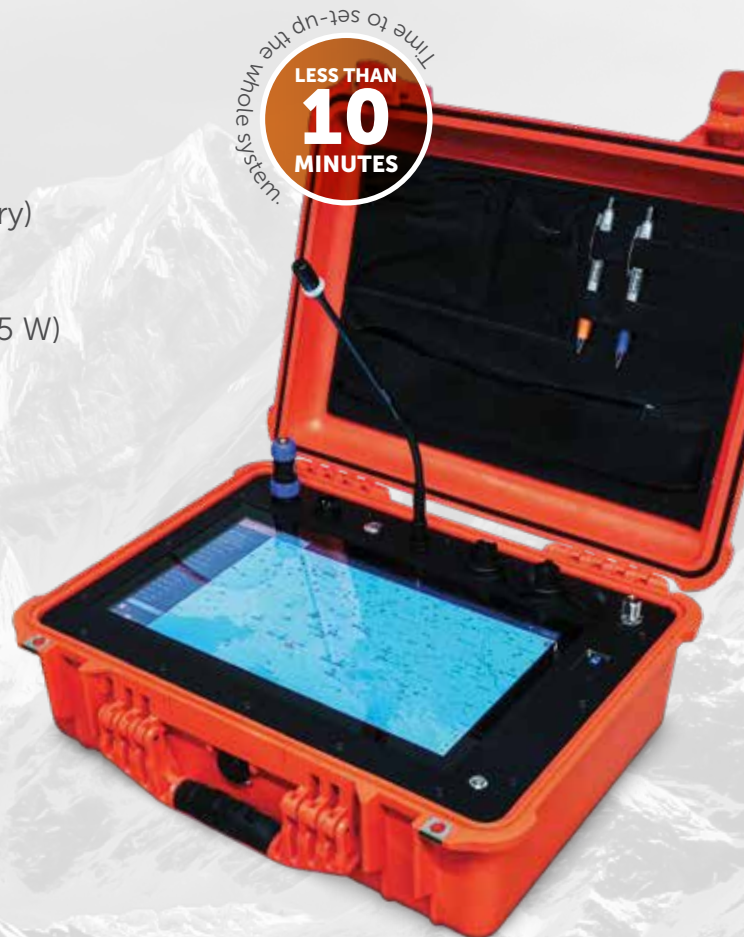

### Functions:

- › Real-time radio station tracking
- › Live heatmap from tracking data
- › Area of interest designation
- › Voice and text communication with radio stations on the field
- › Remote configuration of radio station GPS
- › Radio station status verification
- › Reception of GPS data from other devices (e.g. Garmin watch, smartphone, ...)
- › Communication with other services on the field
